

Declaration of Food Safety for Ezi-action® Drumpumps

What makes the Ezi-action® Drumpumps suitable for Food Liquid Handling?

Ezi-action® Drumpumps are manufactured in Hamilton, New Zealand from very high quality co-polymer polypropylene and LDPE which comply with FDA regulation 21 CFR 177.1520 (Olefin polymers) paragraphs (c) 3.1a and (c) 3.2a and may be used as articles or components of articles intended for use in contact with food, including use in articles used for packing or holding food during cooking.

The lubricant applied to the Ezi-action® Drumpump is specially selected to provide a light, non-toxic film which is clean, colourless, odourless and tasteless and is therefore suitable for food processing machinery. It is approved by New Zealand AgriQuality. It is based on FDA listed ingredients.

Attention to detail is very important during the assembly of the Ezi-action® Drumpump.

Ezi-action® Drumpumps and accessories are manufactured in the premises of New Zealand Pump Company Ltd., 21 Tawn Place, Hamilton, New Zealand.

Manufacturing conditions, quality checks and records, staff training and health and safety are in accordance with ISO 9000 quality standards and New Zealand regulatory requirements. Documented quality assurance systems including quality systems and quality control systems are in place.

Practices are in keeping with good manufacturing practice.

This includes the assurance that all swarf is removed so that there is no risk of plastic fibers contaminating the liquid food being dispensed and that all production is conducted in very clean and tidy environments that are maintained free of dust and pests.

Ezi-action® Drumpumps can be cleaned and inspected.

Ezi-action® Drumpumps can be easily cleaned and they can be dismantled for inspection purposes.

Ezi-action® Drumpumps are traceable.

Each Ezi-action® Drumpump is traceable from the day it leaves the production facility of New Zealand Pump Company Ltd.

Features enhance HACCP Systems

The Ezi-action® Drumpump is supplied fitted with a safety strap over the round ball handle. The safety strap secures the contents against unauthorized usage and accidental discharge. Coloured safety straps are available and can be used to differentiate the liquids being pumped and enhance HACCP and food safety systems.
