

FUEL PURIFIER 2000

PRODUCT NUMBER:

FP 2000

PRODUCT DESCRIPTION:

The RCI Technologies patented fuel purifier is a one-step unit that removes up to 99.8% of free water and up to 95% of other heavy contaminants that are found in diesel fuel. Even today's "clean" diesel fuel will easily become contaminated during transportation and storage. Unlike many other products on the market, the RCI Technologies fuel purifier performs this function without the use of a replaceable, changeable, or cleanable filter element or cartridge. By removing contamination immediately before the fuel enters the engine's filter system, you can keep your fuel clean, preserve fuel quality, and extend the life of your equipment.

The FP 2000 is designed for larger diesel fuel pumping stations, aircraft fueling, fuel docks, and extra heavy-duty mobile, stationary and marine engines. Holds approximately 4 gallons of water and contaminants, takes approximately 25 seconds to drain completely.

PRODUCT FEATURES:

Product	Universal Fuel Purifier
Model	FP 2000
Nominal Flow	100 GPM (378.5 L/min)
In & Out Couplings	2" NPT
Top Port	1" NPT
Sensor Port	1/2" – 20 Straight Thread
Pressure Release Port	1/2" NPT
Safety Feature	Pressure release valve (factory set - 50 PSI)
Drain Port	1" NPT
Height	42.5" (1079.5 mm)
Width	15" (381 mm)
Gross Weight	124 lbs. (incl. mfg. hardware)
Sump Capacity	4 gal.
Finish	Polyester Black Powder Coat – 35 to 40 gloss
Options	Water Sensor Kit 1" M-F brass ball valve (drain)
